

Competition Brake and Clutch Line Kits

The all new Competition and Clutch Line kits feature 2000lb. test nylon tubing. The kits are designed for fast easy installation. Each kit contains the required nylon tubing and special metric hardware to enable you to quickly and professionally install the best looking brake and hydraulic clutch systems available. Kits are available for use with all major brands of pedal assemblies, turning brakes and VW wheel cylinders. Lightweight, strong super nylon brake lines are the perfect choice for all off road racing equipment. Choose your new brake or clutch line kit from one of the applications listed below. Additional hardware and 2000lb. test nylon tubing are available.

These kits fit all master cylinders, turning brakes and VW wheel cylinders.

Easy to install
